CERTIFIED COPY OF  
PRIORITY DOCUMENT

**The Director of the United States  
Patent and Trademark Office**

*Has received an application for a patent for a new and useful invention. The title and description of the invention are enclosed. The requirements of law have been complied with, and it has been determined that a patent on the invention shall be granted under the law.*

*Therefore, this*

**United States Patent**

*Grants to the person(s) having title to this patent the right to exclude others from making, using, offering for sale, or selling the invention throughout the United States of America or importing the invention into the United States of America for the term set forth below, subject to the payment of maintenance fees as provided by law.*

*If this application was filed prior to June 8, 1995, the term of this patent is the longer of seventeen years from the date of grant of this patent or twenty years from the earliest effective U.S. filing date of the application, subject to any statutory extension.*

*If this application was filed on or after June 8, 1995, the term of this patent is twenty years from the U.S. filing date, subject to any statutory extension. If the application contains a specific reference to an earlier filed application or applications under 35 U.S.C. 120, 121 or 365(c), the term of the patent is twenty years from the date on which the earliest application was filed, subject to any statutory extensions.*

**ABSTRACT**

A decorative candle display and a method for its manufacture. The display includes a container with an open top and an interior wall surface and a core candle with an exposed wick situated within the container. Core candle size and placement is such that a chamber is formed between the candle and the wall surface, and a candle wax material filler is disposed within the chamber. A colored gelatinous structure is disposed on top of the core candle and has a substantially vertical aperture through which the wick, extending from the core candle, resides for ignitable exposure above the gel structure. Fabrication methodology includes application of heat to the gelatinous structure to round any pointed border portions thereof and to imbue a sheen to the structure as an inherent heat-induced reaction occurs in the gelatinous material for such sheen production. The decorative candle display here defined provides an aesthetically pleasing contribution by visually combining flame color with gelatinous-structure hues as the candle burns.
